

## **Aditya Self Introduction**

Good morning, sir,

I'm Aditya More, currently in my final year pursuing a bachelor's degree in computer engineering with a CGPA of 8.6.

I've also completed a diploma in Computer Engineering with 86%, which laid a solid foundation for my technical knowledge.

I'm passionate about web development, having hands-on experience with front-end technologies like HTML5, CSS3, JavaScript, and back-end technologies including Node.js, Express.js, and MongoDB.

I have built several personal projects, such as a Med-Finder website, a News App, and an Attendance Portal, which have helped me enhance my problem-solving and coding skills.

In addition to my technical skills, I've completed a React JS course and earned the AWS Certified Cloud Practitioner certification, further developing my knowledge in cloud computing.

I'm excited to bring my skills, dedication, and passion for technology to contribute effectively to your team.

Thank you!
